A society that wishes and intends to remain at the service of the human being at every level is a society that has the common good - the good of all people and of the whole person - as its primary goal. The human person cannot find fulfillment in himself, that is, apart from the fact that he exists "with " others and "for " others.

Compendium of the Social Doctrine of the Church, #165

We see in work, in men’s noble creative toil not only one of the highest human values, an indispensable means to social progress and to greater justice in the relations between men, but also a sign of God’s Love for His creatures, and of men’s love for each other and for God: we see in work a means of perfection, a way to sanctity.
